D. W. McClain, Foreman Industrial Shop.

Mrs. Mary Fellows, Supervisor Sewing Room.

Mrs. Juhl Shelfer, Matron, Nurses' Home.

Mrs. Anna Reed, Supervisor Culinary Department, Receiving Hospital.

#### SUPERINTENDENT'S REPORT

To the Honorable Board of Commissioners of State Institutions, Tallahassee, Florida.

#### Gentlemen:

The Superintendent of the Florida State Hospital hereby respectfully submits his report for the years 1923-24:

For the information of the public generally, or such of the public as are not already familiar with the origin and history of the institution, some facts are given that are already well known to many.

#### HISTORY

The Florida State Hospital was created by Legislature of the State of Florida for the maintenance, care and treatment of the indigent insane of the State, with provision, however, for the care of the insane, other than indigent, at a rate of pay prescribed by the Board of Commissioners of State institutions, which is \$25.00 per month. Out of the 2,305 patients, we have at present only forty pay patients. The location is at Chattahoochee, Gadsden County, Florida, two miles north of River Junction, which is the railroad station; and a little more than one mile east of the Apalachicola River. This location was selected in 1832 as a garrison for Federal soldiers, during the time of the Indian wars, long before railroads, and when the river was the only means of transportation. The buildings erected and used by the Federal Government are still standing and in a good state of preservation. In 1866, the arsenal and all the land, consisting of about 1,800 acres at the time, was ceded by the U.S. Government to the State of Florida. For about ten years following the property was used as a State Penitentiary. Since 1876 it has been used as an institution for the care of the insane. It 3-Hos.

first bore the name of the Florida Hospital for the Insane, but was later changed to its present name—Florida State Hospital.

#### LOCATION.

The location is in many respects ideal. The climate the year round is as good as anywhere in the United States, since it is just cold enough in winter to be bracing, and pleasant in summer without the discomforts of sultriness. It is singular to note that not a sprig of Spanish moss can be found in the trees on this plateau, which fact indicates a dryness of atmosphere for this latitude. Being accessible to river transportation, we have the benefit of water rates, which in the item of coal alone is an economic feature. Being situated in the midst of a splendid agricultural country, where large quantities of farm products are raised, the hospital is enabled to secure at very reasonable prices such products as are grown in a good farming section. The farmers to a great extent throughout this section are white people of a good class, and it is from these families we obtain most of our employees. The Hospital being near their homes, they are happy in their work and contented, which is no small factor in institutional work of every nature.

#### HOSPITAL DEPARTMENT

The Receiving Hospital is a fully equipped hospital building, containing a thoroughly up-to-date operating room with all necessary surgical instruments, first-class X-ray outfit, etc. All white patients, both male and female, are received at this Hospital.

New patients, both white and colored, upon arrival, are first weighed, bathed and put to bed. They are then kept under close observation until a thorough diagnosis is made, and where necessary they are kept here until their physical condition is brought up to normal, that they may be properly cared for in the wards. Also all patients from the wards who become ill are taken to this department for care and treatment. When not necessary that they have such close attention, they are transferred to their respective wards accordingly as they are classified.

There is under course of construction an annex to this building which will accommodate 100 patients. This annex will soon be ready for occupancy. It is connected to the present hospital building by an enclosed corridor, in connection with which there is to be constructed a kitchen and store room for the service of both hospital buildings, staff dining room, nurses' class room, and a clinic room.

This department is under the supervision of Miss Pearl Summerford, a registered nurse of long experience. She is also head of the Training School, full report of which will be found in the report of the Chief Physician.

#### TUBERCULAR BUILDING

A commodious Tubercular Building was erected for white patients in 1913. The magnificent results obtained in the handling of this class of patients justifies the expenditure. It is a modern one-story building, so arranged as to give perfect ventilation and light, with a beautiful park for the use of such patients as can stay in the open. This building is also under the direction of Miss Summerford.

#### GENERAL WARDS

The buildings containing the wards referred to are so arranged and divided that a number of patients can be placed in one large room, or ward. The patients are classed according to their mental condition, and assigned to the particular ward suited to their condition and type. Each ward is provided with attendants necessary for both day and night service. Suitable recreation yards are provided for each race and sex, adjoining their respective

buildings, in which those patients who are incapable of assuming any specific exercise are entertained with outdoor sports.

Mrs. G. B. Kirkland is Supervisor of the White Female Department; Mr. P. L. Laing is Supervisor of the White Male Department; the colored Female Department is in charge of Miss Pearl Trammell, and the colored Male Department is in charge of Mr. S. W. Hall. They have all held their present positions for a number of years and are peculiarly adapted to this class of service. They are distinctly firm and kind, watchful and conscientious, keeping up with each detail of the conduct and work of the nurses under them, upholding and requiring the highest standards of Christian service as applied to the peculiar relationship between patients and nurses in an institution like this.

#### OCCUPATIONAL THERAPY DEPARTMENT

The past two years have shown a wide increase of interest in occupational work in hospitals throughout the country, and its high value as a therapeutic measure is now generally recognized. For arousing patients from introspection, stimulating their attention and giving healthful pleasure in achievement—which in itself is a means of contact with normalcy—no other agent equals properly planned and graded occupation. No patient is forced or unduly urged to work, but through kind and tactful persuasion they respond in a way that reacts as a great physical and mental stimulant.

Mrs. Mary Fellows is in charge of the Sewing Room. An interesting report of the work done in this department will be found by reference to Table No. 5.

The Industrial Department is under the supervision of Mr. D. W. McClain, full report of which is given in Table No. 6.

Interested classes are conducted in basketry, crochet, tatting, needlework, and flower gardening, which not only

affords recuperative occupation, but produces a fund which is used for pictures, records, delicacies, etc., for the patients. These classes are under the direct supervision of Mrs. G. B. Kirkland, and an experienced teacher.

In the course of the past two years we have held various occupational exhibits. Exhibits were sent to the State Fair at Jacksonville and to the Centennial Celebration held in Tallahassee, which exhibit included a miniature reproduction of the hospital, made by patients.

#### RECREATION AND AMUSEMENTS

Co-ordinate with suitable employment for patients are amusements. In the weekly program there is provided a moving picture show, shown on Monday nights for the benefit of the white patients and on Tuesday nights for the benefit of the colored patients. On every Friday night a dance is given, in which the patients dance with the employees of the opposite sex in alternating numbers. The music for these occasions is furnished by a first-class orchestra composed of employees. From time to time other entertainments are staged, such as amateur minstrels, plays, lectures and musical programs, all of which are entered heartily into by the employees for the benefit and pleasure of those under their care.

Like the application of water, music has both stimulating and sedative functions. Good music acts as a tonic and is prescribed by some eminent psyciatrists as a direct and effective remedy for mental disorders. It has been the effort of the present management to furnish music, with as little cost as possible, to the patients. This has been accomplished by employing a few musicians as attendants and in various capacities, and at present we have an excellent band of fifteen pieces under the capable direction of Glen F. Wright. This band plays both standard and popular music, and open-air concerts are given frequently, which are greatly enjoyed, as there is no form of entertainment that will go as far toward relieving the monotony of

confinement as music. We have several pianos in use over the institution and a number of the wards have phonographs.

#### HOSPITAL CHRISTIAN ASSOCIATION

The meetings of this association for the employees are held in the Recreation Hall each Thursday evening. They afford opportunities for systematic Bible study, health lectures, mutual discussion of hospital topics, athletic, social and amusement features, and are well attended. This organization continues to grow in interest and influence.

In connection with the Hospital Christian Association, chapel services are held each Sunday morning. Prior to 1924 we had one chaplain, Rev. A. H. Hancock, but at that time we obtained the services of Rev. F. L. Dykes, which enables us to have a regular weekly service for both white and colored.

#### SOCIAL SERVICE DEPARTMENT

Social service work, in its many and varied phases in an institution of this kind, still occupies the attention, supervision and interest of Mrs. Knott. There is no provision made for this department, but the Hospital receives the benefit of the most conscientious effort and accomplishment in this branch of service.

#### OFFICE WORK

Our Office Force consists of a Chief Clerk and his assistant, one bookkeeper and three stenographers. All Hospital mail is handled in this department, and in addition to the bookkeeping for the hospital, all patients' accounts, and accounts of individual employees are kept. The addition of two physicians to our staff, and the keeping of individual records of each patient, adds a large volume of work for the Medical Department.

#### LAUNDRY

Mr. G. B. Kirkland is in charge of the laundry, which is fully equipped with the most modern conveniences. In connection with the laundry is a pressing outfit, Mr. A. B. Cook in charge, and the receipts for work done in this department are more than sufficient to pay the expenses of same.

#### BARBER SHOP

Our sanitary and up-to-date barber shop is under the direction of Mr. W. W. Mayo. With the increase of patient population, it has been found necessary to add another chair.

#### ADDITIONAL LAND PURCHASED

By authority of the Board, 500 acres of land were bought just across the river in Jackson County at the price of \$20,000.00, and 350 acres at \$14,000.00, the two tracts adjoining, lying along the public highway, and the L. & N. Railroad running through the same, coming into possession of this property January 1, 1924. This is a tract of excellent farming land.

A tract of 900 acres adjoining the Hospital property, near the buildings of same, at \$9,000.00, was also bought. Also two small parcels of land adjacent to the Hospital buildings, the purchase price of same being \$3,250.

It is considered that these acquisitions are necessary and valuable additions to the property.

#### TIMBER

Having manufacturing facilities, timber was also purchased as follows:

Balance of payment on Edwards pur- chase, referred to in previous report	\$3,000.00
Bratcher place	122.50
Turnage place	51.41
Andrews place	38.97
Woolridge place	325.00
Lessee of Hinson	36.25
Atwater place	500.00

Of these, Bratcher, Andrews and Turnage timber has been cut and utilized. We still have of the Atwater about 8%, of the Edwards 50%, while the Woolridge and the Hinson remain intact.

#### FRUIT TREES

In the Spring of 1924 about 400 budded pecan treees were grafted with improved varieties and transplanted in grove shape. We are at this time engaged in further plantings, all of which were grown from seed on the place. We are also transplanting peaches and pears.

#### ACKNOWLEDGMENTS

To the following we wish to express our grateful appreciation:

The State Federation of Women's Clubs for literature, victrola records, and every expression of their interest in the institution.

The Children's Home Society of Jacksonville for their co-operation in placing in homes several young children who were born soon after the arrival of their mothers at this institution.

The State Road Department for their many courtesies.

The Visiting Staff for their assistance and co-operation.

The County Home Demonstration Agents, who have helped us find a market for the products of our fancy work department.

The members of the State press for their generous services and many kindnesses.

The officers and employees, whose co-operation and loyalty have contributed so much to the success of the institution.

And to your Honorable Board our thanks for your confidence and the hearty co-operation extended.

W. V. KNOTT.

Superintendent.

### IN MEMORIAM

To those who faithfully served in the Florida State Hospital and who, in their term of loyal service, have been called to their reward during the past biennium period, we respectfully dedicate this space.

After nine years' service as Pharmacist, Mr. B. F. Bache departed this life on February 5th, 1923, dying suddenly of heart failure at the home of Dr. J. Q. Folmar. "Major" was a man of strong personality and unusual efficiency and integrity, and he is remembered by all his associates as a man whose work could be absolutely depended upon as accurate and unquestionable.

On May 6th, 1923, Mr. Burrel J. Mawhinney passed away after a brief illness in the Receiving Hospital. Mr. Mawhinney had faithfully, efficiently and cheerfully served as keeper of the commissary for five years, but his interest and activity in the work of the hospital was not confined to this one department. He was interested and useful everywhere and in all things. His death was a shock to all who knew him and a bereavement to all associated with him in the service of the hospital, and he will always be remembered with loving devotion and appreciation.

Mr. M. G. Dykes, for three years assistant supervisor and for two years supervisor of the Industrial Department, passed away after a brief illness of pneumonia, on June 25th, 1923. Mr. Dykes was a faithful worker and universally loved for his genial, cheerful temperament, his honesty and energy. His death was a loss felt by every co-worker and mourned by all who knew him.

Mr. C. B. Johns, having given ten years of loyal and efficient service in the capacity of engineer at the water works, passed from among us on February 15th, 1923. Mr. Johns was ever at his post of duty, giving service that the hospital holds in grateful remembrance.

Miss Rosa May Hill, while on her annual vacation contracted measles, from which illness she passed away at her home in Sneads, on March 17th, 1924. Miss Hill had served in the hospital for three years and during that time had endeared herself to her co-workers and particularly to the patients whom she had attended. They were devoted to her and still speak of her and remember her with love and devotion. Her place is one that is hard to fill and her presence one that is not forgotten.

Mr. E. S. Lights, who served as an attendant for a little more than a year, died on April 2nd, 1924. He was faithful and attentive to those entrusted to his care, for which service the Institution is deeply appreciative.

# REPORT OF CHIEF PHYSICIAN

Hon. W. V. Knott, Supt., Florida State Hospital, Chattahoochee, Fla.

#### Dear Sir:

I hand you herewith report of the Medical Department for the years 1923-1924, which, I am glad to say, due to the co-operation of every one concerned, has been carried on in a most harmonious and pleasant manner.

The Staff consists of:

J. Q. Folmar, M. D., Chief Physician and Surgeon.

F. E. Thomason, M. D.

B. F. Barnes, M. D.

H. D. Snyder, M. D.

J. M. Beggs, M. D.

W. C. McConnell, M. D.

W. D. Truett, D. D. S.

There has been added to the Staff during this period two additional members: Dr. J. M. Beggs, whose services were secured on October 26, 1923, and Dr. W. C. McConnell, who entered the service December 1, 1923. Due to the fact that we were unable to carry the work on with the thorough and detailed manner desired with the Staff of four, through the courtesy and consideration of yourself and the Board, and your desire to have the work done in as thorough and efficient manner as possible, originated the necessity of the additional members of the Medical Staff.

In 1923 there were added to the Nursing Staff three graduate nurses, and in 1924 four were added, which gives us a total of nine graduate nurses. This has enabled us to put the Colored Hospital and the Chronic Invalid Wards, each of the Hospital Wards, and the operating room under the direct supervision of graduate nurses, thereby increasing the efficiency in these departments, and adding considerable to the comfort of the patients.

In January, 1923, we suffered the loss of our druggist, Mr. B. F. Bache, and we were very fortunate in securing for his successor Mr. W. S. Ballou, who has been carrying this department on in a very efficient manner since March 1, 1923.

There were in the institution January 1, 1923, 1,931 patients. During this year were admitted 889 patients, released 421, died 299. Admitted during 1924, 1,008; released 436, died 386. Percentages of those released in proportion to the admissions, 45%. Percentage of deaths, 9½%. There were on hand December 31, 1924, 2,266 patients, making a net gain of 335 for the two years.

# REPORT OF THE SUPERINTENDENT OF NURSES FOR THE YEARS 1925-24.

The commencement of the Training School for 1923 was held September 6, 1923, at 8 o'clock in the Recreation Hall, Hon. W. V. Knott, Superintendent, presiding. Diplomas were awarded to five young ladies, being presented to them by Dr. J. Q. Folmar in his usual pleasing manner. A most interesting class address was very ably delivered by Judge E. C. Love, of Quincy, Florida, while Dr. H. D. Snyder presented the Hospital Pins to the members of the graduating class.

The commencement of 1924 was held in the Recreation Hall, June 22, with six young ladies receiving diplomas, which were presented by Mrs. W. V. Knott, and the Hospital Pins were delivered by Dr. J. Q. Folmar. An excellent address was delivered by Hon. W. S. Cawthon, Superintendent of Public Instruction, Tallahassee, Florida.

Both graduating exercises were followed by a reception and dance, music being furnished by the Hospital Orchestra.

Our course extends over a period of three years, including three months probation and three months affiliation in the Georgia University Hospital of Augusta, Georgia. Since the Training School was established our work has constantly increased in scope and volume, and the State Examining Board for Registered Nurses has decreased our affiliation from nine months to three months. The course consists of lectures, recitations, hydrotherapy room, pharmacy and clinical laboratory.

#### GRADUATES-CLASS OF 1922

Miss Elizabeth Carroll, R. N., Head Nurse in Dr. Mc-Kinnon's Private Hospital, Marianna, Fla.

Miss Rossie Carroll, R. N., Night Supervisor of Nurses, Florida State Hospital, Chattahoochee, Fla.

Mrs. Lexie Duncan Traylor, R. N., private duty nurse, in Alabama.

#### GRADUATES-CLASS OF 1923

Miss Dora Fulgham, R. N., Assistant to Superintendent of Nurses, Florida State Hospital, Chattahoochee, Fla.

Miss Martha Hill, R. N., Head Nurse of White Male and Female Infirmary, Florida State Hospital, Chattahoochee, Fla.

Miss Eula McDonald, R. N., Head Nurse of Male and Female Hospital Wards, Florida State Hospital, Chattahoochee, Fla.

Miss Wilma Ramsey, R. N., now Mrs. Joe Cook, of Chattahoochee, Fla.

#### GRADUATES-CLASS OF 1924.

Miss Mittie Cowen, R. N., private duty nurse, Greensboro, Fla.

Mrs. Alva B. Moran, Instructress, Florida State Hospital, Chattahoochee, Fla.

Miss Jewell Ramsey, R. N., now Mrs. Paul Edwards, of Daytona, Fla.

Miss Inez Taylor, R. N., Operating Room Supervisor, Florida State Hospital, Chattahoochee, Fla.

Miss Madie Vickers, R. N., Supervisor of Colored Hospital, Florida State Hospital, Chattahoochee, Fla.

Mrs. Elizabeth Wester, R. N., Head Nurse of White Receiving Wards, Florida State Hospital, Chattahoochee, Fla.

#### STEWARD'S REPORT

COMMISSARY, STORE ROOMS, KITCHEN AND DINING ROOMS

HON. W. V. KNOTT.

Superintendent.

Sir:

I have the honor of submitting you herewith report for the years 1923-24.

During the period of this report extensive improvements have been made. A new kitchen has been built and furnished throughout with modern equipment at a very low cost, most of it being purchased at Government auction sales. A much-needed addition to the White Female Dining Room is just being completed, which will relieve the congested condition. A dishwashing room with equipment to sterilize all dishes, and sanitary drinking fountains installed throughout the entire department.

We have had a better variety of food, and with the increased facilities for handling, the service has been much improved.

All supplies are bought on competitive bids monthly, and upon their arrival are carefully checked into our commissary, from where they are issued daily, and charged to various departments. A perpetual inventory is kept of all supplies. The employees of the Hospittal are given the privilege of buying their supplies at our commissary at a figure covering cost. This arrangement is a help to the employees, and as a result the Hospital is benefited as well.

We have in use at present, in every department of the institution, goods bought at Government auction sales, at from ten to forty per cent of their actual value. This plan of buying has enabled us to furnish the Hospital throughout with necessary equipment, such as clothing, furniture, hardware, machinery, plumbing and electrical supplies, fire-fighting apparatus, etc., that would not have been possible otherwise.

In addition to these Government goods now in use, we have a surplus on hand, in storage, of which the following table will give some idea.

Table showing surplus goods purchased at Government sales, in storage:

Article.	Value.
Clothing	\$15,064.00
Plumbing and electrical supplies	18,278.61
Furniture and office supplies	2,713.80
Machinery	9,910.50
Hardware	5,901.00
Blankets	16,500.00
Shoes	10,000.00
Paint	15,000.00

By referring to Table No. 1 you will note the monthly average and per capita cost of maintenance. There is shown in this table the inventories of 1923 and 1925 of the supplies and equipment in actual use at this time. The above table of surplus goods in storage is not included in this inventory.

Respectfully submitted,

GLEN F. WRIGHT.

#### REPORT OF CONSTRUCTION DEPARTMENT

HON. W. V. KNOTT.

Superintendent.

Sir:

I submit herewith report for the years 1923-24:

The saw and planing mill have run nearly every day during this Biennium, and with the timber purchases made we have been able to a great extent to cut all lumber used for new buildings and repair work at a very reasonable figure. The following is a table of the timber cut and lumber dressed:

	1923	1924
Timber cut	867,496 ft.	1,066,278 ft.
Lumber dressed	488,741 ft.	647,289 ft.
Plaster laths	22,000	106,309
Shingles		38,931

We have been able to use to a very good advantage equipment and material purchased at Government sales, and have on hand at present quite a large amount of this material, consisting of paints, nails, hardware, etc.

The following is a partial list of work done:

#### NEW BUILDINGS

Colored Receiving Hospital.
Colored Ward Building.
Five summer houses.
Three stock barns.
Pump house.
Six dwellings.
Kitchen.
Dining room.
Storage house,
Fire house.
Five garages.

#### REMODELED AND RECONSTRUCTED.

Six dwellings.
Colored Male Building.
White Male Building.
Barber Shop.
Colored Male Dining Room.
White Female Building ceiled and porches screened.
All buildings painted inside and out.
Colored Hospital.

White Nursery.
Addition to Office.

Addition to Superintendent's residence.

In addition to the above, we have a repair crew making necessary repairs daily.

Respectfully submitted,

JOHN B. HOWELL,

Foreman.

#### REPORT OF CHIEF ENGINEER

HON. W. V. KNOTT, Superintendent.

Sir:

I submit you herewith Engineer's report for the years 1923-24:

The power plant has operated continuously throughout
this period, the power only being off when making high
tension connections and changing main steam lines from
power plant, underground to overhead.

The refrigerating plant has functioned very satisfactorily, running every day.

We have been able to use to very good advantage the material and equipment purchased at the Government auction sales and many improvements have been possible by the use of this material.

The following work is that of the electricians, plumbers and engineers:

Thirty teelephones installed.

Twelve new buildings and residences wired throughout.

Eleven motors installed.

Twelve miles telephone line connected.

One large laundry mangle installed.

Six transformers installed.

Three-fourths mile power line run.

Ten sterilizing dishwashers installed.

Sixty-four lavatories, sinks, etc., installed.

Twenty-two showers and bath tubs.

Three miles pipe renewed, water mains, water lines, sewerage, etc.

One and one-half miles steam pipe laid.

Fire extinguishers installed in all buildings.

Sanitary drinking fountains installed throughout entire institution.

In addition to the above, we have kept up all repair work, which is a big item.

Respectfully submitted,

JOHN L. DAVIS,

Chief Engineer.

#### FARM REPORT

Hon. W. V. KNOTT,

Superintendent,

Sir:

Herewith my report as Farm Supervisor for the years 1923-24. It is very gratifying to know that we have furnished the institution in season with fresh vegetables. By tables attached you will find the amount and variety of crops grown.

The freeze in January, 1924, killed all crops ungathered. A conservative valuation of the crops lost would amount to \$50,000.00. Respectfully submitted,

V. C. VASON, Supervisor.

#### VEGETABLES GROWN ON HOSPITAL FARM 1923-24

#### BEEF CATTLE AND HOGS

This department of work is handled by Mr. Sam Sims, the beef cattle being purchased from the surrounding section of country, on foot, and butchered at the Hospital. The following is his report:

#### HOGS

#### On Hand January 1, 1923

Brood sows	50
Boars	4
Shoats	175
Pigs	250
Ready for slaughter	175
Hogs slaughtered (own raising)58,915 lbs.	405
Hogs slaughtered (bought)	224
On Hand January 1, 1925	
Brood Sows	60
Boars	4
Shoats	900
Pigs	500
Ready for slaughter	300
Hogs slaughtered (own raising)107,520 lbs.	654
Hogs slaughtered (bought) 13,170 lbs.	90

#### BEEF SUPPLY

		Number	Weight
Killed,	1923	 2,103	533,730
Killed,	1924	 2,414	489,223

All of the above beeves were bought with the exception of 35, which were culled from the dairy herd.
